

Application flows

Cardholder perspective

The cardholder receives an email containing a "Activate Card" link.

The cardholder sets a password.

The cardholder sets up a PIN to access card details.

The cardholder receives an SMS on the phone number provided by the admin.

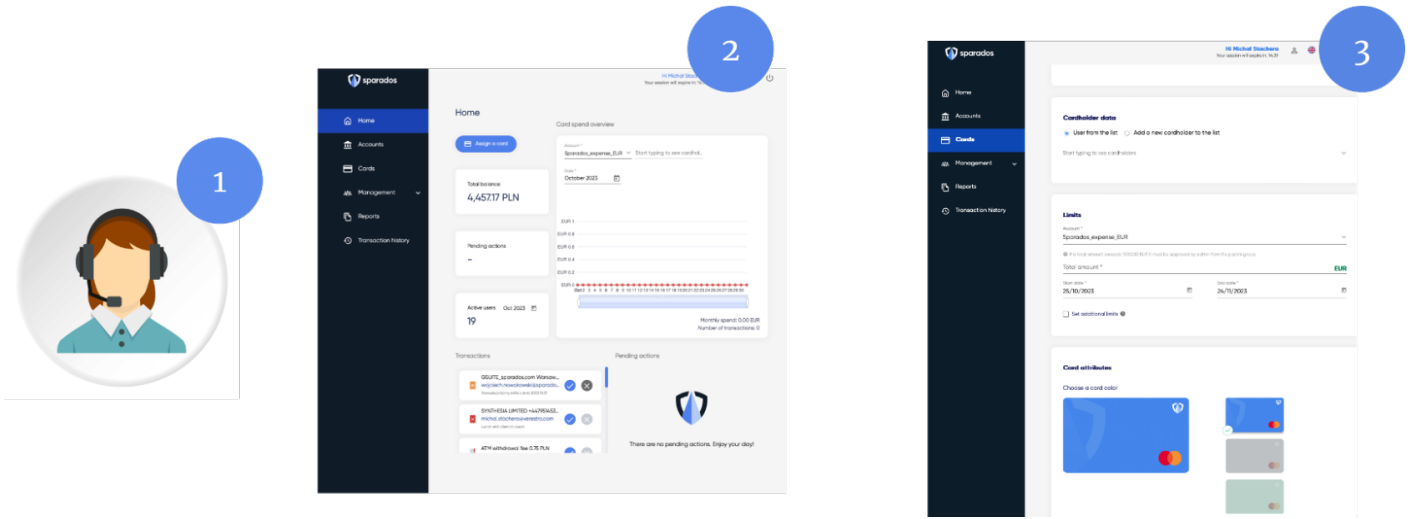

Once the card is generated, the cardholder can add it to their Apple/Google wallet or use it for online payments

On the screens

The screenshots illustrate the cardholder registration process:

- Screen 1:** Welcome screen with a blue card image and an "Activate your card" button. It includes an activation code (4567) and a link to activate the card.
- Screen 2:** "Complete your registration" form. It asks for Name, Surname, Email, Phone number, and Password. It also includes checkboxes for "I accept Terms & Conditions", "I accept Privacy Policy", and "I consent to the processing of my personal data for marketing purposes by Sparados".
- Screen 3:** "Set up PIN" screen. It asks the user to enter a PIN (used for sensitive data) and a second PIN for confirmation.
- Screen 4:** "Enter the SMS code" screen. It prompts the user to enter a code sent via SMS to +4854321547.
- Screen 5:** "Business card" screen. It displays a virtual business card with a budget of €1,000.00 and a "Add new card" button. It also shows "Your limits" (e.g., limit to 10,000) and a "Transaction history" section.

Administrator perspective

On the screens
